PROFESSIONAL SUMMARY

Final-year Computer Science (AI specialization) engineer with hands-on experience building and deploying Machine Learning and Deep Learning models — spanning Computer Vision pipelines (YOLO, OpenCV) and NLP-based classification systems — across production and personal projects. Delivered 90%+ ROC-AUC and improved model accuracy by 30% through data preprocessing, feature engineering, and hyperparameter tuning. Skilled in Model Deployment through REST APIs and Docker, with strong Data Analysis fundamentals to surface actionable insights. Seeking an AI/ML Engineering role to build and deploy scalable, real-world ML systems.

SKILLS

Programming: Python, Java, C++, C, SQL, OOP

AI/ML: PyTorch, Scikit-learn, OpenCV, YOLO, NLP, Pandas, NumPy, Feature Engineering, Model Evaluation, Hyperparameter Tuning, Classification, Regression, Cosine Similarity / Text Vectorization

Deployment & Web: Flask, FastAPI, Streamlit, REST APIs, HTML/CSS/JavaScript

MLOps: Docker, Docker Compose, Git, Jenkins, MLflow, CI/CD for ML

Core CS: Data Structures & Algorithms, DBMS, Computer Networks, Data Analysis

Tools: GitHub

INTERNSHIP / INDUSTRIAL TRAINING

AI Engineer — Aimen Electronics India Pvt. Ltd.

Nov 2025 – Jan 2026

- Developed and deployed machine learning models in Python, improving prediction accuracy by 40% through data preprocessing, feature engineering, and hyperparameter tuning.
- Achieved 90%+ ROC-AUC on production classification models; performed data analysis to surface actionable business insights.

Android App Developer — Secure DataWare Technologies

Aug 2025 – Oct 2025

- Designed and implemented Android application features using Java and XML across multiple modules.
- Led unit testing and debugging efforts, ensuring a zero-critical-defect production release.

PROJECTS

AI Vehicle Detection Web Application [Python, OpenCV, YOLO, Flask]

[\[Demo\]](#)

- Built a real-time vehicle detection and classification pipeline using YOLO and OpenCV, served through a Flask-based web application.

TruthLens AI — Fake News Detection System [Python, Flask, Scikit-learn, NLTK]

[\[Demo\]](#)

- Built an NLP-based classifier using TF-IDF vectorization and Logistic Regression to flag news articles as real or fake, reaching 92%+ testing accuracy on 6,300+ political news articles.
- Engineered a text preprocessing pipeline (stopword removal, Porter stemming) and deployed a Flask web app with real-time confidence scoring and a visual risk meter.

AI HR Helpdesk Chatbot [Python, Flask, Scikit-learn, NLTK]

[\[Demo\]](#)

- Developed an intent-classification chatbot using TF-IDF and Logistic Regression to interpret employee HR queries and return relevant FAQ responses in real time.
- Built a Flask-based web interface with a customizable JSON intents dataset, covering common HR queries such as leave requests, timings, and payroll.

EDUCATION

Saveetha School of Engineering, SIMATS, Chennai

2023 – 2027

B.E. Computer Science and Engineering (Artificial Intelligence) — CGPA: 8.83

S.R. Junior College for Boys, Hanamkonda

2023

12th Grade (HSC) — Mathematics, Physics, Chemistry — 95%

Shine High School, Hanamkonda

2021

Secondary School Education — CGPA: 10

CERTIFICATIONS

- SQL Database Specialist — Oracle (Credential ID: 100878604OCSSQL12C), October 2024
- Human Computer Interaction — NPTEL, Jan–Apr 2025
- Internet of Things (IoT) — NPTEL, Jul–Oct 2025
