Professional Summary

AI/ML Engineer with experience in predictive modeling, **REST APIs**, **data pipelines**, and model deployment using **Python**, **Scikit-learn**, and **PyTorch**. Improved model accuracy by 40% and achieved 90%+ ROC-AUC on real-world projects. Strong in **Data Structures**, **DBMS**, **Computer Networks**, and **Version control**, seeking an AI/ML and Software Engineering role to build scalable solutions.

Skills

Programming skills: Python, Java, C++, C, SQL, OOPS
Core skills: Data Structure, DBMS, Computer Networks
Libraries/Tools: PyTorch, Scikit-learn, Pandas, Numpy, GitHub
Specializations: Artificial Intelligence & Machine Learning, SDLC

Internship/ Industrial Training

Aimen Electronics India Pvt.Ltd – AI Engineer (Nov 2025– Jan 2026)

Developed and deployed machine learning models using Python, improving accuracy by 40% through data preprocessing, feature engineering, and hyperparameter tuning; performed data analysis to drive business insights.

Secure DataWare Technologies – App Developer (August 2025 – October 2025)

Designed and implemented Android application features using Java and XML; conducted unit testing and debugging across multiple modules, ensuring a zero critical-defect production release.

Projects

Interior Design Business Website [HTML | CSS | JavaScript]

Demo: [Link](#)

❖ Web Development **GitHub:** github.com/pramithm/interior-design

Developed a responsive interior design website with project galleries, testimonials, and contact form, improving user experience and enabling online client reach.

Movie Recommendation System [Python | Pandas | Scikit-learn | Streamlit]

Demo: [Link](#)

❖ ML Project **GitHub:** github.com/pramithm/Movie-Recommendation-System

Built a content-based movie recommendation system using cosine similarity and text vectorization, delivering personalized movie suggestions through an interactive Streamlit web app.

AI Vehicle Detection Web Application [Python | OpenCV | YOLO | Flask]

❖ ML Project **GitHub:** github.com/pramithm/AI-Vehicle-Detection-Web-Application

Developed an AI-powered vehicle detection system using YOLO and OpenCV, enabling real-time vehicle identification through a Flask-based web application.

Education

Saveetha School of Engineering, SIMATS, Chennai

2023 – 2027

B.E. in Computer Science and Engineering (Artificial Intelligence)

CGPA: **8.83**

S.R. Junior College for Boys, Hanamkonda

2023

12th Grade (HSC) — Mathematics, Physics, Chemistry (MPC)

Percentage: **95%**

Shine High School, Hanamkonda

2021

Secondary School Education

CGPA: **10**

Certifications

- **SQL Database Specialist** — Oracle | October 25, 2024 | Credential ID: 1008786040CSSQL12C
- **Human Computer Interaction** — NPTEL | Jan-April 2025
- **Internet of Things (IoT)** — NPTEL | Jul-Oct 2025
